• The four to bookmark today

CLI

[anthropics/claude-code](#)

The Claude Code CLI itself. Issues = report Claude Code bugs. Releases page = what changed when.

YOUR BACKEND

[anthropic-sdk-typescript](#)

TypeScript SDK. What your Railway backend uses to call Claude.

[anthropic-cookbook](#)

Working code examples — tool use, RAG, vision, sub-agents. The fastest path to "how do I do X."

[modelcontextprotocol/servers](#)

Reference MCP servers — filesystem, GitHub, Postgres, Slack, browser, etc.

• By category

SDKs

Python · TypeScript · Go · Java · Swift · Ruby. Pick by your stack.

PRO TIP

Star github.com/anthropics. New repos get added quietly. A monthly browse is the easiest way to discover what's new.

IF YOU'RE STUCK

"How do I [do X] with Claude?" → check the [cookbook](#) first. 80% of "how do I" questions have a working example there.

WHEN YOU'D REACH FOR EACH

- 1 **Bug in Claude Code**
→ [claude-code Issues](#)
- 2 **Building a backend**
→ [anthropic-sdk-typescript](#)
- 3 **"How do I do X?"**
→ [anthropic-cookbook](#)
- 4 **Adding a new tool**
→ [MCP servers](#) + spec

ENGAGE ANTHROPIC VIA

- 1 **Bug reports**
Repo Issues — reproducible only
- 2 **Best-practices**
Discussions tab on larger repos
- 3 **Small improvements**
PRs — docs fixes, examples welcome
